

URGENT CARE

If your doctor isn't available or you need care after normal office hours, you don't need an appointment to visit a participating urgent or quick care center. Plus, it could save you time and money, and be more convenient than going to a hospital emergency room.

Visit a **quick care clinic** for minor illnesses and injuries or check-ups (PCP copay may apply):

- Sore/strep throat
- Pink eye and styes
- Sprains and strains
- Sinus and ear infections, colds, bronchitis, flu
- Minor skin infections, abscesses, burns, rashes, cuts (bleeding is controlled), and removing stitches
- Wellness and preventive services such as vaccinations, and cholesterol and diabetes tests
- Work, school, camp, or sports physicals

Urgent care centers can treat everything listed above, plus (urgent care copay applies):

- Minor fractures
- Cuts that need stitches

For serious conditions, have someone take you to the closest hospital emergency department. If they can't get you there safely and quickly, call 911.

- Head, neck, spine, or eye injuries
- Chest pain, signs of a heart attack or stroke
- Uncontrollable bleeding
- Major fractures
- Major burns
- High fever
- Breathing difficulties
- Poisoning
- Unconsciousness

For more information, see your provider directory.
